

Ilkka Kunnamo, MD, PhD, born 1955, developed the original idea of Evidence-Based Medicine Guidelines, a comprehensive electronic guideline database published by Duodecim Medical Publications Ltd., Finland, and served as its editor-in-chief between 1988 and 2008. He now serves as the editor-in-chief of the international version, which has been translated into 10 languages. Since 1986 he has worked as general practitioner at Karstula in Central Finland. In 2009 he was appointed adjunct professor of general practice at the University of Helsinki. He currently develops a comprehensive multilingual decision support service (Evidence-Based Medicine Electronic Decision Support, EBMEDS, www.ebmeds.org) utilizing coded data from electronic health records and providing patient-specific reminders, interactive algorithms, smart questionnaires, and population health tools. He has published research papers in informatics, guidelines, polypharmacy, rheumatology, gastroenterology, sinusitis, and diabetes care. He is a member of the GRADE working group, a member of the Executive Board of DynaMed, EBSCO Health, an Editorial Advisor of BioMed Central (London), a founding member of the G-I-N Implementation Working Group and the Multimorbidity Working Group. In 2014 - 2018 he served as chair of the WONCA (World organization of family physicians) Working Party on eHealth.
